

Partnering for Growth

Unlocking the Potential of SMEs.

Private sector development is an initiative supported by DevelopmentAid which can be implemented by governments around the world. The initiative aligns with national strategies to support and grow Small and Medium Enterprises (SMEs). It aims to internationalize SMEs through business and funding opportunities from major development agencies.

Governments can finance the membership to the DevelopmentAid platform for SMEs at a national level, in order for them to access:

-  Business Opportunities (Tenders)
-  Funding Opportunities (Grants)
-  International Matchmaking Tools for Consortia/Joint Venture
-  Due Diligence Screening Tools
-  Awards System with past project experience on international and local firms
-  CV database with 100 000+ development experts
-  Recruitment Tools and Services

If you would like to discuss how you can support the SMEs from your country, please contact us at partnership@developmentaid.org.
